

Your Partner In Soybean Trait Flexibility

In a time period where customers may be confused about soybean herbicide trait packages offered in the marketplace, we at Lukach Seed Agency want to ensure you that we offer a full lineup of **Pioneer® brand soybeans**, including: **NEW Enlist E3®, Liberty Link®, and Round Up Ready 2 Xtend®**, and **Non-GMO** to meet your objectives on every acre.

Enlist™ Victory In the 9th Circuit Court

On July 22nd, 2020, the 9th Circuit Court of Appeals upheld the EPA registration of Enlist Duo® herbicide, which is a pre-mix of Glyphosate and 2-4,D Choline. This proves a major victory for the Enlist™ weed control system in the face of the same court that dealt a crushing blow to Xtend® applications for 2020.

The Most Flexible Weed Control System

While we at Lukach Seed Agency will be offering multiple trait packages going into 2021, we do believe there is a clear leader in weed control and application flexibility. The Enlist™ system offers the ability to apply 3 different modes of action (see table below), multiple times a year through the R2 growth stage. All of this with no worry about the date on the calendar or what the temperature is during the application.

Trait	Glyphosate (Roundup)	Glufosinate (Liberty)	Enlist™ (2,4-D)	Xtend (Dicamba)
Enlist	x	x	x	
Liberty		x		
Extend	x			x

Demand for the Enlist and Liberty weed control systems will be in very high going into 2021. Please reach out soon to ensure supply for your operation.
